REPORTS & UPDATES

Motor overspeed control DOWNER make hack void Laser etcher from china. (ballsed this bit up)

John Corry and Peter Campbell showed how to set up a way to use the tachometer and how to control the revs in DC motors. The circuits obtained from the Evric website will be posted on our website. Hall effect sensors and a partly manufactured vero board circuit were shown around.

John Corry and Julia McDonald discussed the planning details of the 2011 EV festival being prepared by David Glynne Jones. The date of the festival was confirmed as the weekend of 24 and 25 September. A planning meeting is to be held next Monday (11 April), 7.00pm in the Bistro, Hellenic Club in the City and members were encouraged to attend.

Julia McDonald repeated the presentation, for the meeting, she gave to the Engineers of the AEV Association. This led to considerable discussion about the promotion of and environmental benefits of EVs.

Paul has worked out how to fit all the batteries inside the frame of his Electric Motor bike.

It was agreed that an email group be established for special interest groups forum on web site for EV Motor Sports .

There has been an approach from a Principal of a school at Orange for some help and guidance for a student who wants to build an EV for his year 12 exercise and the possibilities of using the web forums for mentoring was discussed.

CHANGE TO MEETING START TIME

A discussion was held and it was agreed that future meetings will start at 7pm.

MEETING CLOSED

Meeting closed 9:45pm.
